

MAGISTRA 700

Modular cooking

Cooking specialists since 1972

For 40 Years MBM has been producing cooking equipment for the professional catering, developing solutions that make working in the kitchen easier and more efficient.

Specialised operators, modern production technologies and a continuous improvement approach guarantee the quality of MBM products in Italy and abroad.

MBM is part of the Illinois Toolworks group - ITW, worldwide leader in the Foodservice equipment.

Reliable technology

MBM products are the result of thorough design and use of modern and reliable technologies, which guarantee their robustness, performance and durability over time. Each MBM product undergoes careful and accurate controls before being shipped.

At MBM time is money

Optimization of the production technology, up-to-date warehouse organization and efficient customer management allow MBM to provide high-level flexibility and excellent delivery time that allow its partners a prompt response to the market needs.

We give shape to your projects

The MBM Presales consultants, beside the clients since the beginning, are specialized in the creation of layouts in line with the client's needs. Our projects produce personalized and functional working environments that optimize the workflow in the kitchen.

One answer to your needs

MBM offers a complete range of cooking equipment and a wide offer of complementary products for warewashing, preservation and preparation to perfectly meet the needs of the foodservice industry.

Our experience at your disposal

Cooking demonstrations, product presentations and culinary laboratories with trained chefs and professionals are at disposal of MBM's customers to improve the knowledge of the products and the processes that can make work in the kitchen easier and more profitable.

Beside you after the sale

Thanks to a reliable and customer-oriented organization, the MBM aftersales team ensures to your specialized technical personnel prompt support and constant training for the correct installation and maintenance of its equipment over time.

With MBM you choose much more than a kitchen!

Reliable, compact and reasonable

MAGISTRA 700 is the best solution to equip small and medium size kitchens. Reliability, compactness and convenience are the elements characterizing this line.

MAGISTRA 700 is designed and produced to guarantee reliability and high quality standards.

MAGISTRA 700 is designed and produced to guarantee maximum ease of cleaning, installation and maintenance.

The quality of the materials, the reliable technology and the care for details make the **MAGISTRA 700** line an investment to last over time:

- Thick AISI 304 worktop
- Moulded watertight top
- Hygienic tanks with rounded edges
- Cast iron removable high power burners
- Protected low consumption pilot flame
- Single cast iron pan support dishwasher-size
- Stainless steel chimneys
- Elements connection with joints
- Sides and base in strong, thick stainless steel

MAGISTRA 700 IS DESIGNED AND MADE IN ITALY

Gas ranges

The **MAGISTRA 700** gas ranges line comprises models with 2/4/6 burners available as freestanding unit, on an open cabinet or with oven (gas static or electric ventilated) or top versions.

Modularity 40/70/110. Perfect elements connection by joint.

Characteristics of the product range

The watertight pressed worktop is in 1mm AISI 304 stainless steel with drawn edges allows an efficient burning and prevents liquid overflowing, ensuring easier cleaning operations. The removable burners in enameled cast iron and the brass burner caps of 3.5 kW and 6 kW have double spreader with self-stabilizing flame, to cook safely and for simpler maintenance. The pilot flame is protected inside the main burner. The placement of the burners allows use of pans up to 40 cm in diameter. The single cast iron pan support are dishwasher-size.

Versions with oven (static GN 2/1, ventilated GN1/1): stainless steel double-wall cooking chamber with enameled bottom, stainless steel double-wall door with insulating casing. The gas oven has 6 kW (8 kW in maxi oven) burner with self-stabilizing flame; thermostatic temperature control with safety valve and thermocouple; piezo-electric burner ignition. The electric oven has 2,6 kW stainless steel armoured heating elements placed on the bottom and on the top of the cooking chamber; thermostatic temperature control with separate bottom/top temperature control for maximum cooking flexibility.

Burner power (kW)

Electric ranges

The **MAGISTRA 700** electric range comprises models with 2/4 plates available as freestanding unit (on open cabinet and on electric static oven) or top versions. Modularity 40/70. Perfect elements connection by joint

Characteristics of the product range

The watertight pressed worktop is in 1 mm AISI 304 stainless steel. The fast-heating hot plates with safety device to prevent overheating, made in cast iron (round with diameter of 145/220 mm, square with dimensions 220x220 mm) are watertight fixed to the worktop and are powered by 2.6 kW heating elements with 6 (+1) positions thermostat for optimized power control. The 4 squared plates version is powered by 2,6 kW heating elements per each plate. Indicator lights show when each hotplate is in operation. Rounded corners and a moulded recess trap liquids and prevent overflowing, ensuring also easier cleaning. The models with the heating plates aligned with the worktop are powered by 2.5 kW heating elements. The heating hot plates are made in cast iron with dimensions of 300x300 mm. **Versions with electric static oven GN 2/1:** stainless steel double-wall cooking chamber with enameled bottom, stainless steel double-wall door with insulating casing. 5.3 kW stainless steel armoured heating elements placed on the bottom and on the top of the cooking chamber; thermostatic temperature control with separate bottom/top temperature control for maximum cooking flexibility.

SOLID TOP

The **MAGISTRA 700** solid top range comprises models available as freestanding unit, on open cabinet or on oven, and top. Gas or electric supply. Modularity: 70. Perfect elements connection by joint

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm
- Cast iron heating plate, thickness 10 mm

Performance

- 9 kW cast iron burner with piezo-electric ignition

Ease of use

- Isothermal zones for differentiated cooking

Characteristics of the product range

The worktop is in 1 mm AISI 304 stainless steel with pressed edges for liquid collection. The cooking plate with a surface area of 40 dm² is in cast iron (10 mm thickness) with a removable central ring, and it is powered by a 9 kW stainless steel burner, placed under the central ring, with piezo-electric ignition. The hotplate surface reaches 500 °C in the center and decreases toward the edges up to approximately 200 °C, ensuring excellent isothermal zones for cooking over an indirect flame.

In the electric version, the cooking plate made in carbon steel, thickness 15mm, is unique but has 4 cooking zone powered with independent control. Operating temperature: 80-450 °C.

1) Isothermal zones for differentiated cooking

2) Isothermal zones for differentiated cooking (mod ET77)

Induction and glass ceramic top

For a state-of-the-art cooking system in which high performance is matched by power savings and complete cleaning.

The heat is transmitted only to the bottom of the pan for a more comfortable working environment

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm

Performance

- Immediate heat with direct contact of the pan
- Heating proportional to the contact surface
- Reduction in energy consumption of about 50%

Ease of use

- Totally flat surface
- Independent control of the individual cooking areas
- Heat only in the presence of induction friendly pans
- Wok Ø 30 cm

The product range includes 2 or 4 TOP independent induction zones, a wok induction model and modules with 2 or 4 infrared heating zones.

* Available from late April 2015

Characteristics of the product range

The sealed 6mm ceramic top offers high cleaning comfort thanks to the **flat surface and cleanability** of glass ceramic. It is watertight fixed to the AISI 304 stainless steel pressed worktop, thickness 1 mm.

The heating zones, independently controlled, are outlined by screen printed circle Ø 220 mm powered at 3.5 kW each.

The cooking surface only heats up when in direct contact with induction friendly pans and pots, and the amount of heat is proportional to the surface of contact. The zone of the cooking surface not in contact with the pan remains deactivated and thus cold allowing a **more comfortable working environment** (lower heat emission) and a **energy savings equal to 50%** compared to traditional stoves. Each inductor has 6 different power levels and an indicator light shows when the top is in operation.

In the infrared heating plates models, the heat is produced by means of electric elements underneath and transmitted by diffusion. Independent temperature regulation for each cooking area. Indicator lights show when each hotplate is in operation.

1. Maximum cleanability of the surface
Reduction in energy consumption of about 50%

Pasta cooker

The **MAGISTRA 700** pasta cooker range comprises monobloc models with one tank of 26 or 40 liters of capacity, with gas or electric heating. Modularity: 40/70. Perfect elements connection by joint.

Characteristics of the product range

The worktop is in 1 mm AISI 304 stainless steel with moulded edges for liquid collectio. The moulded tanks are in AISI 316 anti-corrosion stainless steel, with rounded corners for easy cleaning. The pasta baskets (optional) are in AISI 304 18/10 stainless steel with thermal handle.

Gas versions: stainless steel burner with self-stabilizing flame. Thermocouple safety device connected to the pilot flame. Piezo-electric burner ignition

Electric versions: electric heating elements in armoured stainless steel; power adjustment with four position switch; control of the temperature with operating and safety thermostat.

Fryers

The **MAGISTRA 700** fryers range comprises models with one or two tanks, with gas or electric heating, available as freestanding unit or top versions. Modularity: 40/70. Perfect elements connection by joint.

Characteristics of the product range

The worktop is in AISI 304 18/10 stainless steel of 1 mm thickness. The AISI 304 18/10 stainless steel tanks, moulded and with rounded corners, are fixed to the surface with continuous welding to facilitate cleaning operations and sanitation. The large cold zone allows maintaining the quality of the oil unchanged longer and provides simpler removal of residues from frying. All the models have safety thermostat and thermostatic coil temperature regulation (90-190 °C), to keep the oil temperature within safety parameters. Large front drainer for greater ease of use and cleaning. The used oil outlet system is simple and safe with an oil collection tank with stainless steel filter.

Gas versions: high output stainless steel burner with horizontal flame, thermostatic temperature control (90-190 °C), safety valve and thermocouple, automatic ignition with pilot flame and piezoelectric device.

Electric versions: armoured stainless steel electric heating elements inside the tank, easily tilted for complete cleaning; thermostatic temperature control.

Fry top

The **MAGISTRA 700** frytop range comprises models for contact cooking with smooth, ribbed or mixed cooking surface with different modular width (half or full unit), with electric or gas heating, all with thermostatic temperature control. Modularity 40/70. Perfect elements connection by joint.

Characteristics of the product range

The worktop is AISI 304 18/10 stainless steel with thickness of 1 mm. The backsplash, in AISI 304 stainless steel of 3 mm thickness, is welded to the cooking surface for greater ease of use and cleaning. The cooking plate has a thickness of 15 mm and a slight tilt to facilitate cleaning operations and discharge of grease into a removable stainless steel basin with capacity up to 2 liters. In full modules differentiated cooking can be done with two independently-heating electric burners/elements.

Gas versions: stainless steel burners with self-stabilizing flame and thermostatic temperature control for a quick recovery of the temperature set. Pilot flame with thermocouple safety control. Piezo-electric burner ignition.

Electric versions: armoured stainless steel electric heating elements; thermostatic temperature control.

Charcoal grill

The **MAGISTRA 700** charcoal grill range comprises both 1/2 or full module models, with gas heating, available as freestanding unit or top version. Modularity 40/70. Perfect elements connection by joint.

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm

Performance

- Independent burners (full moduly modules)

Ease of use

- Adjustable height cooking grill
- Stainless steel removable drawer for grease collection

Characteristics of the product range

The worktop is in 1 mm AISI 304 stainless steel. The chimney grid is made of stainless steel, the cooking grid is cast iron made. An extractable stainless steel drawer with water generates steam during cooking operations. Full moduls (80 cm) have independent heating elements to allow different cooking.

Braising pan

The **MAGISTRA 700** braising pan range comprises freestanding models with gas or electric heating. Modularity: 80. Perfect elements connection by joint.

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm

Performance

- Thermostatic temperature control

Ease of use

- Rounded corners
- Sealed, balanced cover
- Large front handle

MG7GBR77

MG7EBR77

MODEL	External dimensions (cm)	Tank dimensions (cm)	Cooking surface (dm ²)	Tank capacity (Lt)	Burners (kW)	Electric elements (kW)	Total power (kW)	Supply	Weight (Kg)
MG7GBR77	80x70x85	71x48x15	34	60	13.5		13.5		113
MG7EBR77	80x70x85	71x48x15	34	60		9	9	400V/3N/50	118

Characteristics of the product range

The structure is AISI 304 stainless steel 18/10 with scotch-brite finishing. The tank has AISI 304 18/10 stainless steel walls and bottom in AISI 304 stainless steel. Tilting is manual. The rounded corners and the shaped front part facilitate unloading and cleaning operations. The stainless steel lid is balanced and has strong stainless steel AISI 304 hinges and an ergonomic front handle. Water load tap placed on the front of the unit.

Gas versions: stainless steel burner with multiple arms for more even heat diffusion; gas valve with thermocouple, thermostatic temperature control (75-300 °C).

Electric versions: armoured heating elements in stainless steel on the external bottom of the tank; thermostatic control (75-300 °C).

Boiling pan

The **MAGISTRA 700** boiling pan range comprises 50 Lt models with gas or electric indirect heating. Modularity: 70. Perfect elements connection by joint.

MG7G50I77

MG7E50I77

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm
- Anti-corrosion AISI 316 stainless steel tank's bottom
- Pressure gauge

Performance

- Thermostatic temperature control

Ease of use

- Drawn edges for collecting liquids
- Balanced lid with side handle
- Easily removable drain filter

MODEL	External dimensions (cm)	Pan dimensions ØxH (cm)	Pan capacity (Lt)	Burners (kW)	Electric elements (kW)	Total power (kW)	Supply	Weight (Kg)
 MG7G50I77	70x70x85	40x42	50	12.5		12.5		91
 MG7E50I77	70x70x85	40x42	50		9	9	400V/3N/50	93

Characteristics of the product range

The worktop is in AISI 304 18/10 stainless steel of 1 mm thickness with a moulded edges for collecting liquids. The pan is in AISI 304 with bottom in AISI 316 for greater resistance to corrosion. The brass drain tap is equipped with a removable filter.

The AISI 304 lid ensures minimal loss of steam and heat. Hot and cold water tap with swivel nozzle on worktop.

Indirect gas versions: AISI 304 interspace, stainless steel tubular burner with self-stabilizing flame and thermostatic temperature control. Pilot flame with thermocouple safety device. Piezo-electric ignition of the pilot. Safety valve with pressure gauge.

Indirect electric versions: AISI 304 interspace, power adjustment with 4-position switch, pressure gauge for the automatic control of the interspace steam, safety valve with gauge. The low pressure steam in the interspace heats evenly the surface of the pan (for both the indirect versions).

Bain-marie

The **MAGISTRA 700** bain-marie range is composed of two electric model. Modularity: 40. Perfect elements connection by joint.

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm
- Moulded and continuous-weld tanks

Performance

- Electric heating elements in armoured stainless steel

Ease of use

- Thermostat

MG7EBMA477

MG7EBM477

MODEL	External dimensions (cm)	Tank dimensions (cm)	Tank capacity (Lt)	Electric elements (kW)	Total power (kW)	Supply	Weight (Kg)
ON OPEN CUPBOARD							
MG7EBMA477	40x70x85	31x51x16	(GN 1/1)	1.5	1.5	230V/1N/50	34
TOP							
MG7EBM477	40x70x25	31x51x16	(GN 1/1)	1.5	1.5	230V/1N/50	20

Characteristics of the product range

The worktop is in 1 mm AISI 304 stainless steel. The AISI 304 stainless steel tank is moulded and continuous-weld. Gastronorm 1/1 basin capacity.

Electric heating with armoured stainless steel elements, set on the external bottom of the tank and controlled by a thermostat.

Neutral worktop

The **MAGISTRA 700** neutral worktop range is composed of monobloc models on open cupboard and top models. Modularity: 20/40/70. Perfect elements connection by joint.

MG7NA777

MG7NA477

MG7N777

Reliability

- AISI 304 stainless steel worktop, thickness 1 mm
- AISI 304 strong feet, adjustable

Ease of use

- Shaped front
- Module with large drawer (only monobloc)

MODEL	External dimensions (cm)	Drawer	Weight (Kg)
MONOBLOC			
MG7NA477	40x70x85		30
